

Ed-Cred is a comprehensive educational review and feedback platform

The platform empowers educators, parents, students, and staff to share honest reviews while keeping their identities protected.

Category: Anonymous Review System

Location: United States

Challenge: Ensuring users could submit reviews anonymously while still maintaining trust, authenticity, and responsible use of the platform was a key complexity.

Client Overview

Empowering Transparency in Education

Ed-Cred is a comprehensive educational review and feedback platform designed to foster transparency and accountability in the education sector. It enables educators, parents, school staff, and students to share verified experiences and anonymous reviews about teachers, schools, leadership members, and educational institutions.

The platform is built to create a safe and trustworthy environment where users can provide honest feedback without fear of exposure. By combining anonymous submissions with verification and moderation mechanisms, Ed-Cred ensures that reviews remain credible while protecting user privacy.

Challenge

The Transparency & Trust Gap in Education

The education sector lacked a centralized platform for transparent feedback and reviews. Challenges included:

- Absence of a centralized and structured feedback platform dedicated to the education sector.
- Lack of effective accountability and transparency mechanisms for institutions and leadership.
- Risk of biased, fake, or unmoderated feedback due to missing verification systems.
- Concerns around data privacy, security, and legal compliance when handling sensitive information.

Delivering a Scalable and Secure Review Platform

Our team built a full-stack platform using Next.js for the frontend and NestJS for the backend. Key features include:

Multi-Category Review System:

We developed a structured multi-category review system covering Teachers, Schools, Leadership, Staff, and Districts. This ensures organized, scalable, and easy-to-analyze feedback across the education ecosystem.

Anonymous Review Submission:

We implemented a secure anonymous review system that protects user identity while allowing optional verification for credibility. This ensures honest feedback while maintaining trust, privacy, and accountability.

User Authentication & Authorization:

A secure authentication system was implemented with registration, login, and role-based access control, ensuring protected access and proper permission management across the platform.

Results:

The platform achieved:

Secure, scalable, and legally-compliant system

A secure, scalable, and legally-compliant system for handling sensitive reviews.

Empowered the education community with transparent, anonymous feedback mechanisms.

Accountability and continuous improvement

Enabled accountability and continuous improvement in educational institutions.

Built a comprehensive review ecosystem with moderation, verification, and dispute resolution features.

Expertise in full-stack development

Demonstrated expertise in full-stack development for sensitive content platforms.
